

To all our sponsors,

We highly acknowledge and value the big support you are rendering to us in different needs that include our education since primary level up to now at university level.

We are currently pursuing our bachelors degrees in secondary teaching education since 2017 and we are now in our second year this August.

We have been performing so well in our studies just from the day of our first commencements and managed to obtain results that enabled us to qualify to the next level of our study.

This August, 2018 we are getting on our fifth semester of our study which highly deal with assignments and other researches needed in soft (electronic) copies where we do find challenges use the school computer lab as it has specific time of using it, as such, laptops may be efficiency to ~~our~~ our study, as it will enable us to do our assignment on time as compared to when using the school computer lab whose computers are destroyed and has specific time of opening and closing hours.

Otherwise, we do enjoy university life both in life experience and academic and we are over confident that we will finish our studies with good results and

may almighty and highly favour you with  
his blessings due to the support you are  
giving us.

God Bless,

Violet chirwa and

Pumulo Likozo
